

Trust Laban GXT 188 RGB Mouse

Code:
MOUTI21789A

Vendor code:
21789

EAN code:
8713439217896

Laban GTX 188, RGB LED lighting, 5 gaming profiles, Laser, 12000DPI, USB 2.0, 113g

ON BOARD MEMORY

All your custom presets are stored in 1 of Laban's 5 available profiles that are saved in the on board memory. No software is needed when you move from one game to another or from one user to another. Profiles can always be switched on-the-fly. This gaming mouse also make an ideal weapon of choice for gamers who often visit tournaments or huge LAN-parties, since you will always have your optimized settings with you.

ADJUSTABLE, FULL RGB LED LIGHTING (WITH RAINBOW WAVE EFFECT)

The full RGB led lighting is adjustable with the included software to create an impressive light show, including the popular rainbow wave effect all around the Laban gaming mouse. Using the preset themes, you are able to control the LED effects; such as full lighted, breathing or flash effect to make the Laban the center piece of your gaming gear.

CONTROL LIKE NEVER BEFORE

Every warrior is lost the second he drops his weapon, so we made sure our Laban mouse has been optimized for maximum grip and control. The extremely accurate optical sensor allows you to use a maximum DPI of 12.000. To also counter your opponents speed, we've added low-friction Teflon glide pads on the bottom om the mouse and placed the easy access buttons in an ergonomically location right next to your thumb.

ADVANCED GAMING SOFTWARE

The Laban has its own AI that allows you to combine consecutive actions into a single click macro. Advanced

gaming software enables you to crouch, fire and reload all with one press of a button. Or come up with your own game-changing combinations.
